TCP Friendly Rate Control (TFRC): Protocol Specification
RFC3448bis

draft-floyd-rfc3448bis-00.txt
S. Floyd, M. Handley, J. Padhye, and J. Widmer
July 2006, DCCP Working Group
Changes from RFC 3448:

- Incorporated changes in the RFC 3448 errata.
- Incorporated the larger initial windows specified in RFC 3390.
- Clarified how the average loss interval is calculated when the receiver has not yet seen eight loss intervals.
- Added more about estimating the average segment size.
Changes for draft-floyd-rfc3448bis-01.txt:

• Specified the receiver's initialization of the feedback timer when the first data packet doesn't have an estimate of the RTT. From feedback from Dado Colussi.

• Added the procedure for sending receiver feedback packets when a coarse-grained timestamp is used. From RFC 4243.

• Specified the procedure for initializing the loss history then the first data packet sent is lost or ECN-marked. From Dado Colussi.
Changes still to make:
