1. Which of the following best reflects your view of the homework load?

wS8o6M I think this is a real great article. Will read on...

2. On average, how much time would you estimate it takes you to:

Read the paper assigned for a homework - wS8o6M I think this is a real great article. Will read on...

Write up your answers to the homework after having read it - wS8o6M I think this is a real great article. Will read on...

3. Here are some possible ways of reducing the homework load. For each, please indicate the degree to which you think it would be a good approach to take.

quite good good neutral bad quite bad no opinion see comment below

Same type of assignment, but expectation is for writeups to have less detail, along with less feedback per writeup

Same type of assignment, but only one a week

Each week, one assignment of the current form, one of a shorter form (for example, the shorter one might not require reading a paper)

When computing the homework portion of class grades, only take the top K of the remaining N assignments into account (say for $K = N/2$), so skipping N-K assignments has no penalty.

Comments / additional ideas: wS8o6M I think this is a real great article. Will read on...

4. In general, what facet(s) of the course do you think are working well?

5. In general, what facet(s) of the course do you think aren't working well?

6. For things that aren't working well, any suggestions on how to improve them?
