Are Bots & Spam the New Black Gold?

Storm worm 'making millions a day'

Compromised machines sending out highly profitable spam, says IBM security strategist

Clive Akass, Personal Computer World 11 Feb 2008

The people behind the Storm worm are making millions of pounds a day by using it to generate revenue, according to IBM's principal web security strategist.

Joshua Corman, of IBM Internet Security Systems, said that in the past it had been assumed that web security attacks were essential ego driven.

How can we **measure** this?
Seemingly only knowable by
the spammers themselves.

- Spam finance elements:
 - Retail-cost-to-send vs. Profit-per-response
 - Key missing element: spams-needed-per-response, i.e., *conversion rate*
